

# Albert Waterways Child Care Centre

We were approached by the management of this existing child care centre, which had been run by the local council and had converted to a private enterprise. Our brief was to double the size of the centre, revamp the outdoor playground spaces, and create better facilities for the staff.

There were a number of issues to be addressed

We worked with the centres staff, parents and the local community. We held a number of consultation sessions in the evenings to enable the parents to participate in the design process.

Project Budget: \$250,000.00

Design Period: 12 weeks

This project is currently awaiting further funding.
