

Heather Street, Wilston

Townhouses

Originally this project was to relocate an existing house and create a second new residence at the rear of the property. But for a number of reasons the owner changed to two new residences.

Due to the size of the property and the slope of the land we faced a number of issues.

We addressed privacy issues between the residences and the adjoining properties, and were able to keep a large mature tree in the rear yard.

Each residence has four bedrooms, a separate laundry, double lock up garage and a large terrace - which captures the breezes.

Design Period: 9 Months
